Spring @ SI

Spring is typically a slow time for computer repair, but you wouldn't know that right now at Schrock Innovations! Our award winning service and support as well as our willingness to pick-up and drop-off computers at no additional cost have made our gas-conscious computer users very happy!

No matter how hectic your life is, Schrock has a service to get your computer up and running on your schedule. You can bring your sick PC in to one of our Service Centers in Lincoln or Omaha, you can call us for a free pickup from your home or

business, or schedule an in-home visit at no extra charge.

With spring comes the threat of severe weather. You know how to keep your family safe, but do you know what you have to do to keep your computer safe? The #1 defense your computer has is a fresh surge protector. If you haven't replaced your surge protector in the past year, chances are it is time to do so. Look in this newsletter for a 50% off coupon and get your computer the protection it needs!

At Schrock Innovations we are always looking for new ways to make your computer work for you!

Take a moment to browse through this newsletter for money saving coupons, and new features in our *On the Radio & On the Web* sections!

SCHROCK INNOVATIONS

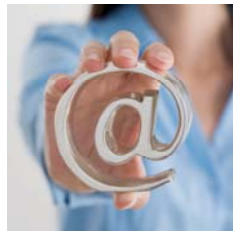

Spring Newsletter

A Website for Every Season

WWW.SCHROCKINNOVATIONS.COM/WEBPORTFOLIO

Schrock Innovations is Lincoln's most trusted web development company. We develop professional-quality websites for as little as \$499, and we can have your online presence on the web in two weeks or less!

Schrock Innovations has one of the most talented website development

teams in Nebraska. When you have SI develop your website, you gain the services of two skilled coders, a professional photographer, and an award-winning graphics artist.

In as little as two weeks, we can develop a website for your business that looks impressive, and helps generate revenue for your operation.

Please take a moment to look at our online portfolio.

If your business or organization could benefit from a website, please feel free to call us at 866-496-8772, or call your local Schrock Innovations Service Center.

Mention this newsletter and we will register the domain for your new website for free. That's a \$30 savings!

Tech Byte

Is your
Internet
Browser
Slow?

You can restore your Internet Explorer back to its original speed and quickness with a little bit of quick housekeeping. Open your control panels and double click on Internet Options. On the General tab, click on Clear History, click on Clear Cookies, then click on Clear Temporary Files. A new window will open. Check the box and click OK. This one may take a while, so be patient. That's all there is to it! Happy browsing!

Storm Warning

- THOR SCHROCK

With severe weather on the way, understanding what a surge protector does and why it is important to have one that works properly is more important than ever. Here are the top three myths out there when it comes to surge protection:

MYTH: THE ONLY RISK FROM SURGES IS HARDWARE DAMAGE.

REALITY: Stray power surges can alter data or programs, causing data errors or lock-ups which cannot be traced. The consequential cost of such soft damage can be very high, especially if errors are not found and data files are contaminated.

MYTH: ANY SURGE PROTECTOR IS BETTER THAN NOTHING

REALITY: With no surge protection at all, incoming surges will hit only the computer's power supply. When you have an old or worn out surge protector in your home surges can be distributed to all of the equipment on the strip, or even worse, through the ground in your home to other outlets. If you are going to have a surge protector, it needs to be working properly!

MYTH: A BATTERY BACKUP PROVIDES GOOD SURGE PROTECTION.

REALITY: Because a UPS costs far more than a surge protector, it is often assumed to provide better surge protection. However, virtually all UPS units simply combine an inexpensive surge suppressor with a battery backup power source. These units are often solid-state components with modest tolerance for high energy surges, so they may not prevent a surge from passing through.

If you haven't replaced a surge protector (attached to your computer or not) in the past year, chances are it is no longer working properly. Use the 50% off coupon in this newsletter to replace all of your old power strips today!

For the Kids

Summer is coming and that means the kids are out of school. Well here are a few websites to keep you sane, and keep the kids healthy and happy, courtesy of Schrock Innovations.

Wondering what happened to the games we played as children, kids can look up popular games like tag, heads up 7 up, capture the flag and more at:

www.gameskidsplay.net. Fun

games for wee ones at: www.chevroncars.com/wocc/ or the Disney Channel at <http://Disney.go.com>.

Wean your teen off MTV with <http://channelone.com>. Like these sites? You can find more on our website just look for the Summer Kids Section.

Spring Surge Protector Sale

The best surge protection for your PC, at just \$24.99 with coupon, for a limited time.

Coupon required for discount. No quantity limit, see ad on previous page for details. Coupon expires 6/30/06.

On the Radio

For the 6 years now, Thor Schrock, of Schrock Innovations has been answering your computer questions live on the radio, **Saturday mornings at 10:00 AM on KFOR 1240 AM.**

Tune in each week for computer Q&A, tech tips, top websites and much more! You can also listen live online at www.schrockinnovations.com. If you miss the show you can listen to archives on our website.

PC Pizzazz

Feng Shui for your desk?

Why not? Could it hurt to have a little extra energy flowing through the place that you work, pay your bills, talk to friends, or play? This online article from iVillage makes Feng Shui as easy as 1,2,3. Follow these simple steps to arrange your desk and start the good vibes flowing.

For example place pictures of the kids, and that "World's Best Dad" mug on the mid right side of your desk to keep your creativity flowing. Keep your wits about you by organizing your desk drawer and placing

your books on the front left section of your desk (this one's good for kids doing homework too!)

To try your hand at desktop Feng Shui check out the article at:

<http://home.ivillage.com/decorating/fengshui/0,,h6h0,00.html>

or go to schrockinnovations.com and click on PC Pizzazz where you'll find a handy link. Tune in to *Compute This* each week for another website recommendation from me...

Kimberly

On the Web
